

360/OS Open Source Summit

July 6-7 - Warsaw, Poland

On the sidelines of the 2017 Global Forum, the Atlantic Council's Digital Forensic Research Lab will host its inaugural 360/OS Open Source Summit. The summit is the first of its kind to bring journalists, activists, business professionals, and policymakers together to harness the power of open source, social media, and digital forensic research.

360/OS will feature industry experts and leading journalists, who will lead an exclusive group of participants through live trainings and the latest techniques in open source research and technology.

This network of #DigitalSherlocks are at the heart of the global movement to expose falsehoods and fake news, document human rights abuses, report the actuality of global events in real-time, and build digital resilience worldwide.
